SUMMARY

GenAI Engineer with hands-on experience building agentic AI systems, **Retrieval-Augmented Generation (RAG)** pipelines, and **Model Context Protocol (MCP)** tooling. Computer Science undergraduate at MAIT and GenAI Intern at NIIT; independently designed and shipped **semi-autonomous** code-review and repository-analysis agents from prototype to production, backed by **318 automated tests** and **sub-15-second review turnaround**. Proficient in Python, FastAPI, Flask, **Google Gemini**, **LangChain**, and vector databases. Seeking a GenAI Engineer role focused on shipping agentic systems to production.

EDUCATION

Maharaja Agrasen Institute of Technology - New Delhi, India

Aug 2023 - 2027

B.Tech, Computer Science and Technology

- Relevant Coursework: Data Structures and Algorithms, DBMS, OOP, Operating Systems, Machine Learning

Oxford Senior Secondary School - New Delhi, India

2023

Senior Secondary, Science Stream

SKILLS

Languages: Python, Java, JavaScript, C++, C, SQL

GenAI and LLMs: LangChain, RAG, MCP, AI Agents, Prompt Engineering, Google Gemini, Mistral AI, Embeddings, MMR Retrieval, Hugging Face, Langfuse

Backend, APIs and Data: Flask, FastAPI, REST APIs, Pydantic, MCP SDK, PyYAML, GitPython, Python AST, ChromaDB, Pandas, NumPy

Tools and Platforms: Git, GitHub, Vercel, Streamlit, VS Code, Jupyter Notebook, Google Colab, Matplotlib, Seaborn

EXPERIENCE

GenAI Intern, NIIT Limited - New Delhi, India

Jun 2026 - Present

- Shipped 2 independent GenAI applications end-to-end using Flask, FastAPI, **REST APIs**, **Pydantic schemas**, and **ChromaDB**, following production-grade project structure and version-control practices.
- Self-directed applied learning across **LangChain**, **Model Context Protocol (MCP)**, and **Google Gemini**, covering LLM integration, **RAG** pipelines, prompt engineering, and agentic architecture design.
- Researched and integrated Google's **Agent-to-UI (A2UI)** protocol into an agentic workflow, combining **MCP** tool interoperability, **AST-based static analysis**, and structured JSON UI rendering.

PROJECTS

AI GitHub Agent

Python, FastAPI, React, Google Gemini, RAG, MCP, Pydantic, AST | [GitHub](#) | [Demo](#)

- Built a **semi-autonomous multi-agent system (Planner-Executor-Validator)** that plans code changes, validates them in a sandbox, and drafts pull requests on GitHub repositories for human review.
- Architected a full-stack, two-track system: an offline pipeline (**AST-based parsing**, metadata extraction, vector embeddings) and an online FastAPI pipeline with Pydantic schema validation and a React frontend.
- Implemented **RAG-based semantic retrieval** over any GitHub repository via the **GitHub API** using **Google Gemini** embeddings; exposed agent tools through **MCP** and shipped with **318 automated tests**.

AI Engineering Review Platform

Python, Flask, MCP SDK, Google Gemini, Langfuse, AST | [GitHub](#) | [Demo](#)

- Built a deterministic code-governance platform enforcing configurable engineering standards through **12 automated checks** across Metrics, Complexity, Security, and Maintainability, via an **MCP** client-server architecture.
- Implemented a config-driven **Company Rule Engine** enforcing **6+ YAML policies** (function length, forbidden calls, docstring coverage), so review verdicts update with configuration edits without code changes.
- Used **Google Gemini** as the reasoning layer to explain and prioritize deterministic findings, returning a full review in **under 15 seconds** per run, rendered as typed JSON components on a vanilla JavaScript frontend.
- Integrated **Langfuse** for end-to-end LLM observability, tracing input, output, corrected output, metadata, and root-cause backend error details per run, with **trace latency capped at 15 seconds**.

LEADERSHIP

Executive Head, Event Management, CSI College Society, MAIT - New Delhi, India

2023 - Present

- Orchestrated **5 large-scale technical events**, including a **Microsoft Hackathon**; managed **30 volunteers** across **4 departments** with a budget exceeding **Rs. 1 Lakh**, delivering all milestones on time.
- Redesigned outreach across **3 communication channels**, growing event attendance **40% (120 to 170 participants)** within one academic year through targeted engagement strategies.

AWARDS

- Solved **150+ DSA problems** across **22 core patterns** (arrays, graphs, DP, trees, sliding window) as part of structured placement preparation.
- Received a written appreciation letter from the HOD, MAIT, for organizing the **Microsoft Hackathon** under CSI College Society.
